**: 15 seconds**

If you breathe Florida's air, drink its water, or drive its roads every day, you're a part of our state's energy community. The Florida Energy Commission is working to help the Florida Legislature make the best possible decision for your energy future.

In March, the Florida Energy Commission's Advisory Groups will meet in Jacksonville and Tallahassee. We hope you'll come out and share your energy philosophy. Speak up – the Florida Energy Commission is listening.

For meeting information or to share your good energy ideas, e-mail [info@floridaenergycommission.gov](mailto:info@floridaenergycommission.gov).
